

FINCA SACHAVACAYOC

Best of Tambopata 2 nights tour

An Amazon lodge for nature lovers

OVERVIEW:

Finca Sachavacayoc has the best location in the Tambopata Region, bordering the Tambopata National Reserve, easy to access to 3 oxbow lakes (oxbow lakes are the best areas to see wildlife in the Amazon, the more lakes you visit, the better)

Condenado Lake is close to the lodge, and Sachavacayoc is deep in the jungle; with this to you get to see wildlife like no other place along the Tambopata River: monkeys, black Caymans, chances of seeing Giant Otter, macaws, different species of birds, romantic and relax excursions around the lake. The most spectacular clay lick in the world, the best combination to enjoy the jungle with activity, comfort, and successful excursions

TOUR IN THE TAMBOPATA NATIONAL RESERVE

- 1 Visit Chunchu Macaws clay lick.
- Tres chimbadas lake with Giant otters
- 50 m canopy tower
- Full river journey
- Cayman search
- Jaguar search
- Optional Piranha fishing (NO EXTRA PAYMENT)
- 2 Nights at the exclusive Finca Sachavacayoc lodge

ITINERARY

DAY 1 *Welcome to the Amazon!*

Arrival and reception will be by our guide or transfer to the airport or bus station. Our guides are experienced professionals with deep knowledge of the area and rainforest. Transfer from the airport to our central office in town. Upon arrival in Pto. Maldonado City, our Transfer or guide, will welcome you and drive you to our headquarters in town for a few minutes. In our office, it's mandatory to pack only the necessary stuff for the next few days; the main luggage will stay at our safe deposit. Transportation is easier that way, and to keep our boats and porter cargo light, we lend duffel bags at the office if necessary.

We have our private port by the Tambopata River. We navigate up the Tambopata River for about 2-3 hours until Finca Sachavacayoc (time will depend on the times we stop to see wildlife). On the way back, if lucky, we can watch birds, caimans, capybaras, and monkeys. Box lunch on the boat. We can customize your box lunch with a vegetarian/vegan option. In full company and orientation of our guide, we get to Finca Sachavacayoc. Accommodation and a Little rest. After a bit of rest, we will go for a jungle walk as an introduction to nature and the forest interior; wait until it gets dark to do a night walk looking for the elusive nocturnal creatures and critters, like the impressive ground bird-eating Tarantula (as big as your hand). Dinner at the lodge.

DAY 2 *Macaw Clay Lick and Lake*

We will visit one of nature's wonders, the spectacular Chuncho clay lick, the largest in the world.

Here, the three major species of macaws get together simultaneously, and there are many varieties of parrots. Hundreds of parrots come together to eat clay, a special and unique behavior only found in this part of the planet.

We depart early at 4 a.m. and spend 2 hours on our boat upstream of the Tambopata River; to enjoy the best of the parrot show, arriving early before the birds is essential!

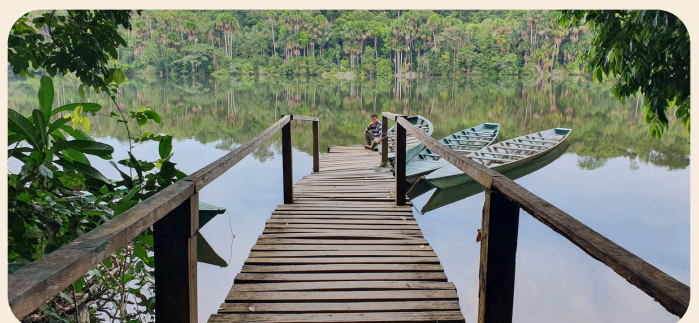

We will have breakfast on the boat. Along the journey to the clay lick, we have great chances of seeing Capybaras, Caymans, and maybe, if lucky, Jaguar or Tapirs (the two most special terrestrial mammals of the Amazon). If necessary, we stay in the clay lick area until we see the macaws eating clay. Return to the lodge for lunch.

Lunch at the lodge.

After a good rest, we get packed and ready for Tres Chimbadas Lake, which is 30 minutes down the river from Finca, then a 25-minute walk through the nice jungle to get to this spectacular lake with a resident family group of 8 Giant otters. Tres Chimbadas Lake has excellent wildlife, like monkeys, caimans, Hoatzins, and macaws flying by to roost. We also have the chance to do piranha fishing while looking at the wildlife and the lake's beauty.

We get there by evening, and right away, we take a paddle canoe and leisurely enjoy the deepest and wildest jungle, watching monkeys and macaws being loud.

On the way back, we return to the lodge, trying to spot the nightlife along the riverbank if lucky, a rare species may show up. Dinner at Finca.

DAY 3

Canopy Tower and Lake

Early, when best, we will visit our spectacular canopy tower, the tallest and most robust of the region, 50m tall, to see canopy birds, possible monkeys, and a different and breathtaking view of the mighty jungle. Breakfast at the lodge and departure to Pto. Maldonado.

The boat journeys back to Pto Maldonado for 2 hours, and we have the last chance to spot wildlife along the riverbanks.

We will arrive at our office in town and provide full assistance or a transfer for your scheduled flight/bus or hotel.

End of our services.

PD: For those who want to experience piranha fishing, this is free and is no extra cost.

Important notice

On the last day, we have 2 set shuttles back to the city; please take into consideration this for flights:

Shuttle one: Leaves the lodge by 5 am for the 8-9 am flights

Shuttle two: leaves the lodge between 8-9 am for all the rest of the flights: 11x am, 12x pm, 1xPm, 2xpm, 5xpm, nights busses or hotels

For arrival, we don't recommend the 4xpm flight

For departure, we don't recommend the 5xpm flight

WHAT TO BRING

- FLASHLIGHT OR TORCH (HEADLAMP IS BEST)
